## Annual Report

Funding Year: 2007

ALMA Link Officer: Charles Hosanna Mchomboh

Greetings from the Diocese of Niassa. It has been a blessing to see what God is doing in our lives as a Diocesan family. Thank you very much for your Support and Prayers. This report covers the activities carried out in the year 2007, especially which I am directly involved with; Emergency Relief Support, Messumba Cathedral Maintenance, Messumba Clinic and Milanje Primary School Construction.

### Emergency Relief Support:

In the year 2007 six hundred households with an average of five members per family were affected by floods along the Shire River in the Ecclesiastical District of Zambezia and Ecclesiastical District of Lago. The funds received from ALMA helped to restore physical, mental and spiritual well being of the people affected by floods.

The funds were allocated in three aspects:

- Providing food and materials to affected families
- Support beneficiaries on how to restart
- Integrated a component of stewardship

Having successfully implemented the project, some remarks from Local Authority: Chief Muroro, thank you very much for saving us from hunger.

### Messumba Cathedral Maintenance

From the previous report, the work is at an advanced stage though the river has been a barrier to passing with loads of construction materials. The side chapels of the main stream has been renovated. The contract period has been extended.

### Messumba Clinic

The construction of the clinic has been a challenge due to financial release system. The construction of the clinic was agreed to take five months but due to lack of funds there has been delay. Though the situation is like this, the maternity wing has been finished; currently they are finishing the out patient wards. The construction of the clinic will be winded up by first week of May. It's my plea that all funds allocated to Construction of the Clinic be released as soon as possible to meet the demands of the MU between the Diocese and the Contractor.

### Milanje Primary School

The work is going well; currently the contractor is doing roofing which will go on till next week. Hope to hand over the school to Diocese by this month end of April 2008.
